

INSTRUCTIONS FOR AUTHORS - SCIENTIFIC ARTICLES

1. SUBMITTING MATERIALS

Materials will be accompanied by the signed form of copyright transfer and by the checklist, sent by fax, mail or e-mail after electronic scanning. The authors assume full responsibility for the original character of the material submitted for publication.

Materials will be sent to the following address:

E-mail: redactia@medichub.ro

Address: Green Gate, Bd. Tudor Vladimirescu nr. 22, 11th floor, 050883 Bucharest, Romania Phone: 004 031 425.40.40 | Fax: 004 031 425.40.41 | www.medichub.ro

Each article is evaluated by the peer-review committee, which consists of two, independent reviewers. In accordance with the peer review protocol, the author of the article under consideration will be kept anonymous.

2. PUBLISHED MANUSCRIPTS / SUBMITTED FOR PUBLICATION

Articles previously published in other journals or in another language, will not be taken into consideration. If the material has been previously submitted for publication to another magazine and was not accepted, the author is invited to send the comments or the feedback of the peer-review committee.

If the manuscript requires minor changes after the independent review (peer-reviewed) or stylistic/ language correction, the article is accepted for publication in the reviewed form, without requesting the consent of the author. If the changes are deemed "major" (scientific or expression errors that can affect the quality of the scientific message) the author will be contacted by a member of the editorial staff, and the article will only be published after the author approves the modifications deemed necessary by the peer-reviewers.

In some cases, upon written approval of both the author and the reviewer (peer reviewer), the chief editor and / or publisher may decide to publish the manuscript, accompanied by reviewer's opinion and reasoning.

The order in which the manuscripts are published in the magazine is determined by the date the material enters the newsroom, by the editorial needs and the compliance with the above recommendations. Priorities may occur for some topical articles, for editorial explicitly requested materials or those showing a special interest in the editorial opinion.

3. AUTHORS

Each author must be able to prove his active participation in the study. Their inclusion is based solely on the substantial contribution to the concept, model, data collection or analysis, processing and interpretation of the results or critical review. Agreement for each final version should be sent along with the manuscript. Other persons who contributed to the work, such as study participants will be included under "Contributions". The letter accompanying the submitted material should note that all authors meet the requirements.

4. PERMISSIONS

Citations, tables, figures, etc., must be accompanied by the author's written permission for reproduction, together with all the references. Photos of the identifiable persons must be accompanied by their signed consent for publication. If consent is not provided, all areas that could suggest the identity of the person or persons should be obscured or covered.

Patients have the right to privacy. This right can only be waived after obtaining informed consent from the patient.

5. WRITING ARTICLES

Written articles generally comply with recommendations made by the International Committee of Medical Magazines Editors (www.icmje.org). Only manuscripts written in Romanian or English will be considered for publication. Articles written in Romanian must use Romanian diacritics. Articles must be submitted in Microsoft Word *.doc) with font size 12, spaced 1.5 lines. The manuscript must be submitted in its final form, corrected (including bibliography) and must be scientifically and linguistically coherent.

The pages of the article should be numbered and the manuscript should adhere to the following format: title, authors, bilingual written summary (Romanian and English), keywords (no more than 5), the actual text of the manuscript, intertitles, thanks and / or contributions, references, figure legends and tables. It is the author or authors' responsibility to ensure that the electronic document is complete and accurate at the time of submission.

The title of the manuscript must be brief (maximum 60 typographic signs) and in accordance with the content of the paper.

Authors. The authors will provide full first and last name, academic degree, the highest academic title, city and country of residence at the time of writing the manuscript. If there are relations / commitments which could be construed as a potential conflict of interest, they will be listed here. Each manuscript will be signed by a maximum of three authors. If there are more than three, additional authors can be mentioned in the "Acknowledgements and / or contributions" at the end of the article).

Abstracts and keywords. Each item must be accompanied by a summary in Romanian and an abstract in English. Each abstract should be within 1,000 signs typographical and must include (in the case of the original studies) the aim or purpose of the study (motivation), the method used (clinical study, experimental, meta-analysis), the main results and conclusion - the meaning of the results. New aspects of the study will be also highlighted. General abstracts for the papers must include a general description of the topics presented. There will be 3-5 keywords under each summary (in Romanian and English) which will be displayed for indexing.

Abbreviations. Abbreviations are not accepted either in title or summary. The units of measurement shall be expressed according to the International System, enabling the use of internationally accepted abbreviations. In the manuscript, only standard medical abbreviations should be used. (see the AMA manual for abbreviations <http://www.amamanualofstyle.com>.) In text abbreviations will be explained in brackets after their first appearance.

Text. The use of brand names or trademarks is permitted only when justified within the text; any medications mentioned in the article should only be listed under their generic name. If the author indicates that the use of the brand name of the drug is mandatory, the manuscript must be accompanied by a report justifying the use of the brand name. The editorial staff has the right to refuse the use of brand names in the papers published.

Book reviews, essays in magazines, information regarding the company's profile activity and scientific events: maximum printing 1,500 signs; for the book's reviews, the manuscript will be accompanied by a scanned copy of the cover (minimum 300 dpi). To check the number of typographic signs in the Word document, select the text where you want to count typography and select from [Tools] the [Word Count] option.

6. REFERENCES

Observe the "Uniform requirements for manuscripts submitted for publication in biomedical journals" (whose full version in English is available at www.icmje.org). References should be numbered in the order they appear in the text, with Arabic numerals in parentheses. It is mandatory that all sources included in the bibliography to be cited in the text; references to works not mentioned in the bibliography should not appear in the text. Titles of periodicals should be abbreviated in accordance with the accepted Vancouver reference style. Information from unpublished sources but accepted for publication, may be cited - these particular indications shall appear under "printed" indication, in the bibliography, between parentheses. If the work is not yet accepted, the entry will appear as "unpublished observations". Only citations that have been verified by the author will be approved for publication.

If the cited bibliographic resource has more than three authors, only the first three authors will be quoted, followed by the words "et al". A manuscript should not include more than 15 citations.

Examples of proper citations

- 1. For magazines:** authors, the original title of article, the magazine with international abbreviations, year, volume, issue number, start and end page [Lerner D.J., Kannel W. B. Patterns of coronary heart disease morbidity and mortality in the sexes. A 26-year follow up of the Framingham Population. *Am Heart J* 1986; 111: 383-90].
- 2. For monographs:** authors, the original title, publisher, city, year, number of page [W. Donegan, J. Spratt *Cancer of the breast*. 4th edition. Ed. Saunders, New York, 1995. p 48-56.]
- 3. Treated chapter:** Ledger W.J. Dystocia and prolonged labor. In: Wilson JR, Carrington ER, editors. Volume 8: *Obstetrics and Gynecology*, St Louis: Mosby; 1987:474-93.

7. FIGURES, IMAGES, TABLES

Figures (drawings, diagrams) must be professionally rendered and should be sent separately (not included in the document). The document should only contain cited figures, consecutively with Arabic numbers with a title and a legend. The images and figures should be in .jpg, .tiff, .eps at least 300 dpi. All figures should be numbered in Arabic numerals. The author(s) should indicate where the figures need to be placed in the text. Specify image source (own collection etc.). All images will be accompanied by a statement that the manuscript author holds the copyright for the image and agrees with their publication. We do not accept photos taken from the Internet.

Tables will be included in the document and each table must be numbered and accompanied by a brief explanation or of legend (if any).

8. COPYRIGHT

By submitting manuscripts for publication, the authors:

- Assume full responsibility for the scientific content of the submitted manuscript and the accuracy of the submitted data;
- Assumes the co-author role of the manuscript (any eventual subsequent accusation of plagiarism should be addressed solely to the author / authors who signed the manuscript);
- Declare that they are the rightful owners of the images and / or information submitted for publication or have permission to reproduce the materials for publication in magazines whose intellectual property rights are not their own;
- Declares that the message / content of the manuscript is not influenced and / or dictated by commercial interests of prior commitments or any other relationships with third parties that could be considered conflicts of interest;
- Copyright fully transferred to MedicHub Media.

9. OTHER SPECIFICATIONS

The above limitations can be ignored in special circumstances, with prior consent of the editor and / or publisher.

The published materials will not be returned. Editorial has the right to republish the materials in the same magazine and / or endorsed republishing the manuscripts in other publications of MedicHub Media.

The full and official version of the recommendations for biomedical journals can be found at: www.ICMJE.org. Failure to follow the above recommendations may result in delays in the publication of the material or to the decision of not publishing them.
